

# *Supporting* Birds + Bears

## All Types of Bird Feeders Attract Bears!

Bears love bird seed, suet, and hummingbird nectar for their easy calories. Sadly, bears are shot every year for accessing human-provided foods on private property.

Seeds & suet attract rodents and small mammals to your yard

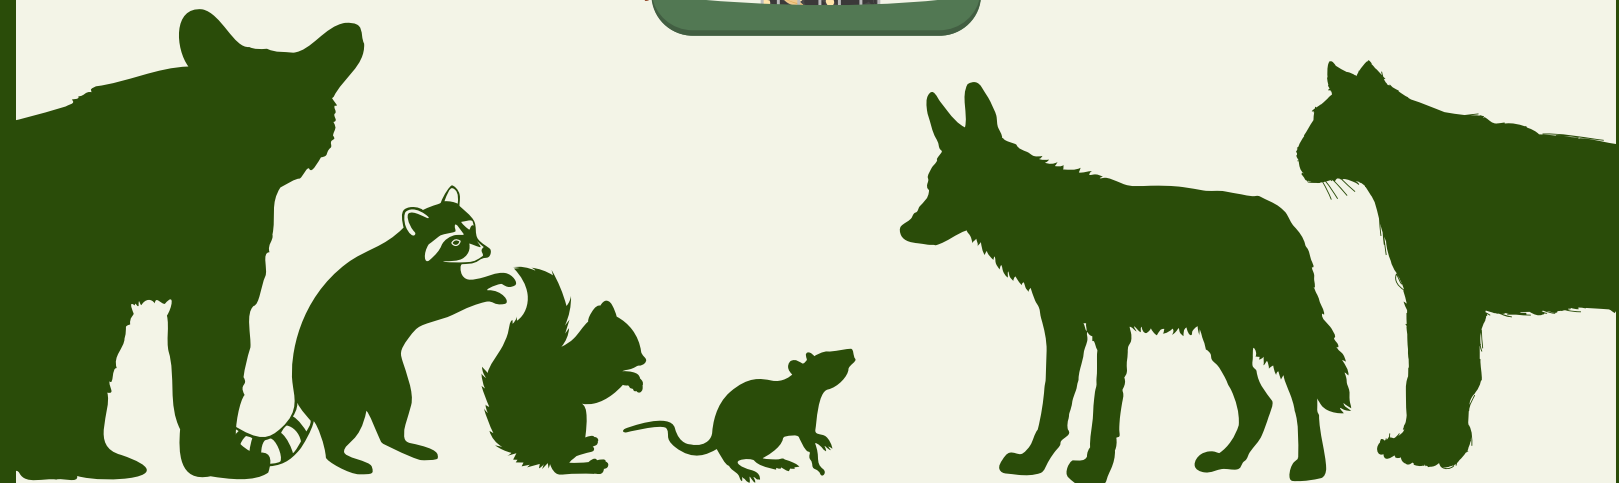

This may lead to increased rodenticide use

Small species attract larger carnivores, like coyotes & bobcats

This may lead to denning in residential areas & pet predation

## You Can Help Birds & Wildlife By:

1

Setting up a Bird Bath with Dust or Water

2

Planting Native Flowers for Hummingbirds

3

Keeping Cats indoors & Dogs on-leash
